THE TRAUMA COURSE THAT STARTS... WHERE THE OTHER COURSES END

Programme Description

Unlike trauma education programmes targeted at prehospital and emergency care providers, the Trauma Care After Resuscitation (TCAR) course is specifically designed for ward care, critical care, perioperative, and rehabilitation nurses. The course will also appeal to other health professionals working in trauma settings.

This programme gives inpatient staff members the foundational, evidence-based information and critical thinking skills necessary to provide excellent care to this challenging patient population.

Trauma Education in the Age of Social Distancing

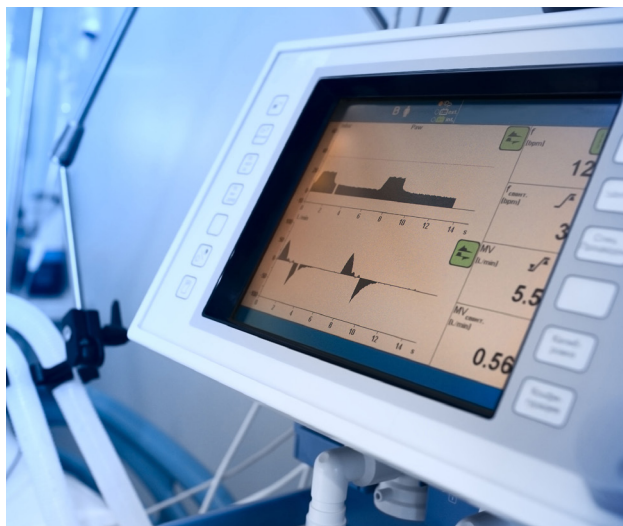

The new Live Online™ format brings TCAR-HK to you, wherever you are. This virtual version of the course includes interactive quizzes, Q&A opportunities, and features the same in-depth material and high-quality visuals as in the classroom. **Course content is divided into four individual, 4-hour parts.** Enrollment includes an extensive, full-colour, downloadable manual. In order to ask questions and participate in interactive polls, **each delegate MUST have a personal device (mobile phone, tablet, or laptop) and internet access.**

TCAR
TRAUMA CARE AFTER RESUSCITATION

TRAUMA CARE DOESN'T STOP AT THE A&E DOORS. WHY SHOULD TRAUMA EDUCATION?

- Mobilisation
- Delayed Injury Presentation
- Sepsis & Organ Failure
- Rhabdomyolysis
- Nutrition
- Pain Management
- Geriatric & Bariatric Patients
- Late Complications
- Compartment Syndrome
- VTE Prophylaxis
- Intra-Abdominal Hypertension
- Wound & Skin Care
- Alcohol Withdrawal
- Post Traumatic Stress
- Fluid Management
- Organ & Tissue Donation

Programme Overview

The course begins by focusing on concepts relevant to the nursing care of the injured, hospitalised patient:

- The trauma care spectrum
- The biomechanics of trauma
- The body's response to injury

Delegates apply information by participating in interactive expanding case scenarios that focus on admission-to-discharge care of patients with injuries to various body regions. Cases include the surgical, medical, and nursing management of patients with:

- Thoracic trauma
- Abdominal trauma
- Musculoskeletal trauma
- Head trauma
- Spine & spinal cord trauma

A TRAUMA FUNDAMENTALS COURSE DESIGNED TO SATISFY THE LEARNING NEEDS OF INPATIENT NURSES AND OTHER TRAUMA CLINICIANS
