TCAR - Trauma Care After Resuscitation

TCAR Program Overview

TCAR is divided into 8 modules consisting of ***multiple bite-sized segments*** with many interactions to reinforce learning. The TCAR course begins by focusing on concepts relevant to the nursing care of all injured, hospitalized patients:

- The trauma care spectrum
- The biomechanics of trauma
- The body's response to injury

Learners practice applying these concepts as they progress through case scenarios that cover the ***injury-to-discharge care*** of patients with trauma to specific body regions. Cases include the surgical, medical, and nursing management of patients with:

- Thoracic trauma
- Abdominal trauma
- Musculoskeletal trauma
- Head trauma
- Spine & spinal cord trauma

The Trauma Course that Starts Where Other Courses End

Topics Include

- Fluid Management
- Delayed Injury Presentation
- VTE Prophylaxis
- Sepsis & Organ Failure
- Transfusion
- Compartment Syndrome
- Mobilization
- Rhabdomyolysis
- Pain Management
- Interpreting Vital Signs
- Geriatric & Bariatric Patients
- Nutrition
- Intra-abdominal Hypertension
- Late Complications
